

III. REMARKS

1. Claims 1, 11 and 15 are amended. Claims 22-25 are new.
2. The change to claim 15 changes "activated" to "deactivated" in order to clarify that feature of the claim.
3. Claims 1 and 11 are amended to recite that the antenna structure comprises a contact pin for electrically connecting the antenna structure to a circuit board when the contact pin makes electrical contact with a first contact spring on the circuit board. This is not disclosed or suggested by Aldous (U.S. Patent No. 6,266,017). Aldous does not disclose or suggest a contact pin and contact spring for establishing an electrical connection. Therefore, claims 1 and 11 should be allowable.

Claims 2-5, 6-10, 12-14 and 17-18 should be allowable at least in view of their respective dependencies.

4. New Claim 24 describes features related to the function of the locking arrangement. The principle of the barrel-cam locking mechanism of Philips is different from the locking arrangement of Applicant's invention, which comprises a lever and lever guides.

For all of the foregoing reasons, it is respectfully submitted that all of the claims now present in the application are clearly novel and patentable over the prior art of record, and are in proper form for allowance. Accordingly, favorable reconsideration and allowance is respectfully requested. Should any unresolved issues remain, the Examiner is invited to call Applicants' attorney at the telephone number indicated below.

A check in the amount of \$158 is enclosed for additional claim fees. The Commissioner is hereby authorized to charge payment for any fees associated with this communication or credit any over payment to Deposit Account No. 16-1350.

Respectfully submitted,

Geza C. Ziegler, Jr.
